

Sprint 2 10/02/2018

- Major tasks/activities

1. Activity Title: Database Design

- a. Objective: Determine the structure of the database and implement it.
- b. Deliverable: A sketch of the basic structure of database.
- c. Progress: We've finished design but have not done any implementation yet
- d. Time remaining: 5
- e. Next steps: Add more detailed component and insert some testing data.

2. Activity: Wireframe design.

- a. Objective: Decide on the wireframe for all pages of the mini-program.
- f. Deliverable: A sketch of wire frame
- b. Progress: Done with the first draft, asking potential user for feedback on design.
- c. Time remaining: 3
- d. Next steps: add interactive features to the current wireframe.

3. Activity: Design Flow

- a. Objective: UI/UX design
- b. Deliverable: None
- c. Progress: Currently working to be familiar with the tools for the mini-program
- d. Time remaining: 10+
- e. Next steps: Will start design when wireframe modified according to user feedback.

- Individual Contributions.

- 1. Ciel: database design and setup – 5 Hours
- 2. Yushu: wireframe design and sketching – 3 Hours
- 3. Yushu: ask for potential user feedback on design – 2 Hours
